TOTAL EXPERIENCE: 5 YEARS 9 MONTHS | AWS CERTIFIED SOLUTIONS ARCHITECT – ASSOCIATE

PROFESSIONAL SUMMARY

Cloud platform engineer with 5+ years of hands-on experience on **AWS and Azure**, building and running production platforms with **Docker, Kubernetes (EKS/AKS), Terraform and CI/CD (Jenkins, GitHub Actions)**. Strong in cloud networking (VPC/VNet, VPN, load balancers, DNS), secrets management and security hardening, scripting (Python, Bash, PowerShell) and monitoring with Datadog, Grafana and CloudWatch.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, VPC, IAM, ECS, EKS, ECR, S3, RDS, Lambda, Route 53, CloudWatch), Azure (AKS, ACR, Azure DevOps, Key Vault, Azure Monitor), GCP (GKE, Compute Engine, Cloud SQL, Pub/Sub, Cloud Functions)

DevOps & CI/CD: Jenkins, GitHub Actions, CI/CD, Azure DevOps, AWS CodePipeline, ArgoCD, Git, GitOps

Infrastructure as Code: Terraform, CloudFormation, ARM Templates, YAML

Containers & Orchestration: Docker, Kubernetes, EKS, ECS, AKS, GKE, Helm, OpenShift

Monitoring & Observability: CloudWatch, Grafana, Datadog, Dynatrace, Splunk

SRE & Operations: Incident Management, RCA, Capacity Planning, Availability & Reliability Engineering, Change & Release Management, Production Support

Scripting & Automation: Python, Bash, Shell Scripting, PowerShell; Linux (RHEL, Ubuntu)

Networking & Security: TCP/IP, DNS, VPN, SSL/TLS, Load Balancers, VPC/VNet, IAM, RBAC, Security Groups, NACLs, Secrets Management (Azure Key Vault), Vulnerability Scanning & Remediation

Databases: PostgreSQL, MySQL, Amazon RDS, Cloud SQL

Collaboration & Documentation: SOPs, Runbooks, Knowledge Management, Stakeholder Communication, Mentoring

PROFESSIONAL EXPERIENCE

Senior Project Engineer - DevOps & Cloud

Wipro Limited | Greater Noida, India | Feb 2021 - Present

- Managed and resolved production incidents and critical support tickets across AWS environments, ensuring SLA compliance.
- Participated in 24x7 on-call support, troubleshooting infrastructure, application, and deployment issues and coordinating with cross-functional teams during major incidents.
- Performed root cause analysis (RCA) for recurring issues and implemented preventive measures to improve system stability and reduce incident recurrence.
- Provisioned and managed cloud infrastructure using **Terraform** across AWS and Azure environments, ensuring consistency, scalability, and reduced manual effort.
- Built, maintained and enhanced AWS infrastructure including **EC2, ECS, EKS, VPC, IAM, RDS, S3, Lambda, Route 53, Load Balancers, and Auto Scaling** services.
- Managed Kubernetes workloads on **Amazon EKS**, including deployments, scaling, troubleshooting, ingress configuration, and cluster monitoring.
- Developed and maintained CI/CD pipelines using **Jenkins, GitHub Actions, and AWS CodePipeline** enabling faster and reliable application deployments.
- Containerized applications using **Docker** and deployed microservices to **ECS and EKS** through automated deployment pipelines.
- Implemented infrastructure monitoring and alerting using **CloudWatch, Grafana and Datadog** improving visibility and reducing incident resolution time.
- Reviewed Terraform changes, deployment plans, and release activities to minimize production risks and ensure smooth application rollouts.
- Optimized cloud resource utilization through infrastructure right-sizing, Auto Scaling, and cost monitoring, helping reduce overall cloud spend.
- Implemented security best practices including **IAM policies, RBAC, Security Groups, NACLs, encryption, CloudTrail auditing, and vulnerability remediation**.
- Designed and maintained cloud networking on AWS and Azure: **VPC/VNet, VPN connectivity, load balancers, Route 53/DNS and SSL/TLS** for secure, highly available workloads.
- Automated provisioning, deployment and routine operational tasks with **Python, Bash and PowerShell** scripts, reducing manual effort and human error.
- Managed secrets and credentials using **Azure Key Vault** and IAM-based access controls; integrated container vulnerability scanning into CI/CD pipelines.
- Supported Azure cloud initiatives including **AKS, ACR, Key Vault, Azure Monitor, VNet configuration and landing zone implementation**.

- Worked closely with development, QA, and business teams to support releases, troubleshoot issues and communicate incident updates.
- Created technical documentation, operational runbooks, and standard operating procedures (SOPs) to improve team efficiency and knowledge sharing.
- Mentored junior engineers on Terraform, Kubernetes, AWS services, CI/CD processes and production support activities.

Summer Intern – IoT Engineering | IIT Patna | Patna, India | Jun 2020 – Aug 2020

- Designed and implemented an IoT-based distance-measuring device integrating sensors, microcontrollers, and cloud data transmission for real-time monitoring.

Intern | C-DAC | Jan 2020 – Mar 2020

- Completed a 2-month internship at C-DAC, gaining hands-on exposure to software development and systems fundamentals.

PROJECTS

Multi-Cloud Infrastructure Automation | Terraform, AWS, Azure, GCP, Bash, Helm

- Built reusable Terraform modules for VPC/VNet, EKS/AKS clusters, and RDS, reducing provisioning time from days to under 30 minutes; applied IAM/RBAC controls and cost-control tagging.

Observability Stack Implementation | Grafana, ELK, Datadog, EKS

- Designed metrics, dashboards, log and alerting for EKS microservices, enabling proactive incident response.

GenAI Application Deployment on AWS ECS | Docker, ECS, ECR, RDS, GitHub Actions

- Optimized compute and networking for a production GenAI workload and automated build and release with GitHub Actions and Amazon ECR, including vulnerability scanning and zero-downtime deployment.

Online Voting System for College Elections

- Developed a web-based voting system for college elections (Head Boy, Head Girl, Coordinator) with secure login, candidate and vote validation, and real-time result generation using a relational database.

Travel & Tourism Itinerary Planner

- Developed a travel planning application that generates customized itineraries based on user interests, budget, destination, and trip duration, with destination recommendations, trip scheduling, and booking-related information.

KEY ACHIEVEMENTS

- Reduced infrastructure provisioning effort by **60%+** through Terraform automation.
- Reduced deployment time by **40-50%** through CI/CD and containerization improvements.
- Improved monitoring and observability with Datadog, Grafana and CloudWatch dashboards and alerting.
- Achieved **15-25% cloud cost optimization** through resource right-sizing and utilization analysis.
- Successfully deployed and supported a **GenAI application on Amazon ECS** using automated CI/CD pipelines.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified Cloud Practitioner
- Google Cloud Digital Leader
- Microsoft Certified: Azure Fundamentals (AZ-900)
- GitHub Copilot Certification
- Jenkins, Kubernetes, and Docker – Internal, Wipro

EDUCATION

- MTech – Software Systems | BITS Pilani | 2021 – 2024
- BCA – Bachelor of Computer Applications | L.N. Mishra College | 2017 – 2020
